Aspirating Smoke Detector

TITANUS MICRO-SENS®

Standard Version

TITANUS® aspirating smoke detector

The TITANUS® family of aspirating smoke detectors covers standard to very early warning fire detection as well as a wide range of extreme applications without compromising high levels of sensitivity and performance. Coverage up to 400 m².

Technology

TITANUS *MICRO·SENS*® aspirating smoke detection system combines High-Power-Light-Source (HPLS) technology with patented LOGIC·SENS® fire pattern recognition algorithms and a large portfolio of custom accessories to ensure that each system will maintain high levels of sensitivity and false alarm immunity even in challenging environments. TITANUS *MICRO·SENS*® enables adapted and cost-effective solutions for a wide range of applications. It comes with dry contacts for connection to any fire panel.

Advantages

- High reliability and extended service life due to physical separation of disturbing influences such as dust, vapour or radiation from the measuring chamber
- Optional bar graph smoke level display
- TITANUS *PipeXpress*® software for highly reliable ASD planning with just a few mouse clicks.
- Time-saving installation and commissioning thanks to plug & play philosophy.
- Discreet installation for maintaining aesthetics and providing safety against vandalism.
- Cost-optimized: Only as much technology as necessary, to be expanded and customized
- Intelligent diagnostics tool gives support at inspection and service.

Features

- Max. main alarm sensitivity 0.1% obsc./m
- Coverage up to 400 m²
- Up to 50 m pipe length and up to 8 aspirating holes
- Operating temperature: -20°C bis +60°C
- Optional bar graph smoke level display
- PIPE-GUARD patented airflow monitoring system, sensing changes in total airflow as little as +/-10%
- Dry contacts for connection to any fire panel
- For connection to any fire panel
- Optional Ethernet (TCP/IP)/SNMP/data logger
- Designed for harsh environments, with a wide range of accessories for special applications
- Also available as TITANUS MICRO·SENS® cold storage and ROOM·IDENT version

Approvals

Versions DM-TM(-B)-xx-U available, approved according to UL, ULC, GL and LR. Further information: see corresponding data sheet.

Further approvals on request and a ${\bf www.wagnergroup.com}$

The aspirating smoke detector consists of the detection unit (1), a device base (2) and an adhesive front film sheet (3).

System	TITANUS MICRO-SENS®	TITANUS MICRO-SENS®	
	High Sensitivity	Normal Sensitivity	
Basic device			
Type ("-B" is bar graph option)	DM-TM(-B)-10	DM-TM(-B)-50	
Max. main alarm sensitivity	0.10% obsc./m	0.50% obsc./m	
No. of pipe connections	1 aspiration pipe plus 1 air return		
Max. number of aspiration holes	8		
Max. area of coverage	400 m²		
Max. pipe length (d₀ = 25 mm)	50 m resp. 40 m straight pipe run		
Double-knock alarm verification	optional with detector box		
Alarm levels	241/00/10/1-201/00)	
Supply voltage Front indicators	24 V DC (16 to 30 V DC) according to EN 54-4 alarm, fault, operation		
FIGHT HUGGIOIS	DM-TM-B-10/B-50 with additional smoke level display		
Current consumption ¹ Operational	105 mA		
without bar graph Alarm	110 mA		
with bar graph Operational	140 mA		
Operating temperature	-20°C to +60°C		
Sound pressure level	as low as 40 dB(A)		
Weight (basic configuration)	0.43 kg		
Humidity range	10% to 95% (noncondensing)		
Dimensions	222 x 140 x 70 mm		
Material and colour	ABS, papyrus white (RAL 9018)		
Cable entries	6 x M20 and 8 x M25		
Terminal connections	max. 1.5 mm²		
IP rating	IP 54		
No. of Output Relays (1 A/30 VDC)	2 (alarm: n.c	2 (alarm: n.o.; fault: n.c.)	
Contact load, max.	1 A, 30 V, max. 24 W		
Device basis			
Туре	HB-	HB-TM	
Weight	0.42 kg		
Adhesive front film sheets			
Type for devices without bar graph	FW-TM		
Type for devices with bar graph	FW-TM-B		

¹ At 9V standard fan voltage, 24VDC supply voltage
